

CARE INSTRUCTIONS

Dear Customer,

MONILO's hand-made shoes are designed for the greatest comfort and healthy foot development. Every pair is hand-sewn with special waxed thread by highly skilled artisans, traditionally used by shoemakers to make the most refined hand-made shoes.

The greatest attention to detail is paid to each stage of making process in order to ensure the finest finish possible.

MONILO produces simple and elegant luxury shoes, the value of which is due to the prestige of the materials and a long working, handcrafted process.

Leather - from carefully selected highest quality French calfskin is both soft and light, achieving transparency and ultimate comfort. Natural features of the leather may include creases, shading or other slight imperfections, which should not be considered defects but rather a guarantee of the highest quality materials.

Hardware - signature palladium and rose gold hardware is used to ensure a long lasting and aesthetically immaculate product.

MAINTENANCE

Cleaning - please remove excessive mud or dirt using a wet cloth when the shoes are still damp.

Leather and Grain - should be polished with good quality wax polish or neutral cream.

Suede - should only be brushed with a nylon bristled brush.

NEVER LEAVE SHOES TO DRY IN FRONT OF FIRES, ON RADIATORS OR HOT PIPES. The heat will encourage cracking of the leather and premature wearing, as it will dry out the natural tannage of the material.

Avoid leaving your shoes in direct sunlight.
